

## **Ystral 2015 Catalog – 110% Mixing Solutions Now Available From Powder Technologies**

Powder Technologies, Inc., a market leader in the distribution of powder and liquid processing equipment throughout North America, is pleased to announce the availability of the 2015 Ystral Catalog – 110% Mixing Solutions. The catalog provides an overview of the wide range of Ystral’s products and services, with an additional focus on the processing systems. Technical information is updated and background on the company and its management team with an overview of Ystral’s test center are

provided.

“Ystral is known throughout the industry for their comprehensive knowledge and ability to develop solutions in partnership with their customers to meet application requirements,” states company president, Rick Isherwood. “Although it is hard to demonstrate the passion and full engagement they bring to the process in words, this catalog goes a long way to highlight the personality of the company along with its products.”
